Experience

Full Stack Java Developer

Tietoevry Slovakia s.r.o. • Košice,

05/2023 – 03/2025

In my role as a full-stack developer, I am currently working on a hospital application for the Stockholm region. I utilize Java 17 for the backend and the JSF framework for the frontend. We use Gradle for project builds and Tomcat as the server. The database is hosted on Microsoft SQL Server. I primarily work with IntelliJ IDEA and manage tasks using Jira. My role encompasses both development and maintenance.

Full Stack Java Developer

T-system, s.r.o. • Košice,

09/2021 - 05/2023

As a full-stack developer, I worked on a hospital application. The backend was built with Java 8, while the frontend utilized the Apache Wicket framework. We incorporated several JavaScript libraries for text and PDF formatting within the application. The application used an SQL database, and the server was hosted on Tomcat. I primarily worked with IntelliJ IDEA for development, and we used Jira for task management. My responsibilities included development, maintenance, and writing tests.
