WORK EXPERIENCE

Full stack java developer, Tietoevry Slovakia s.r.o. - Košice, Slovak Republic
May 2023 - Currently

In my role as a full-stack developer, I am currently working on a hospital application for the Stockholm region. I utilize Java 17 for the backend and the JSF framework for the frontend. We use Gradle for project builds and Tomcat as the server. The database is hosted on Microsoft SQL Server. I primarily work with IntelliJ IDEA and manage tasks using Jira. My role encompasses both development and maintenance.

Full stack java developer, T-system, s.r.o. - Košice, Slovak Republic
September 2021 - May 2023

As a full-stack developer, I worked on a hospital application. The backend was built with Java 8, while the frontend utilized the Apache Wicket framework. We incorporated several JavaScript libraries for text and PDF formatting within the application. The application used an SQL database, and the server was hosted on Tomcat. I primarily worked with IntelliJ IDEA for development, and we used Jira for task management. My responsibilities included development, maintenance, and writing tests.

ADDITIONAL INFORMATION

I have two and a half years of experience working with Telekom, where I discovered my passion for web development while taking related courses. My previous role as a train operator taught me how to manage stress in challenging situations, a position that demanded significant responsibility. I consider myself a team player, a quality I have honed through my professional experiences and my hobbies, which include historical fencing and archery. I have a keen interest in computers and am always eager to learn about new technologies. Currently, I am working as a full-stack developer at Tietoevry.
